## Model CR1 Transfer Cabinet

Item No: \_\_\_\_\_

AIA FILE NO. / SPEC NO.

CONSULTANT / CONTRACTOR APPROVAL

The Marshall **Model CR1** Transfer Cabinet features our ThermoGlo™ technology. Heat radiates from every square inch of the upper and lower flat plate heating surfaces. This eliminates the need to clean intricate calrod, wire and reflector assemblies. An integrated temperature/time control maintains consistent programmable product temperatures on both top and bottom of each tier. A four-channel timer allows you to track holding of up to four products. Timers can be “linked” to track product rotation or independent to track individual products.

The CR1’s flat heating surfaces help retain heat more efficiently and longer. This cabinet has the capacity for pizzas, sandwiches and a wide variety of other food products.

All Marshall products are supported by a nationwide service organization and an in-house, full-time Customer Support Department. To place an order, call:

**1-800-627-8368**

**Marshall's Transfer Cabinet incorporates ThermoGlo™ technology designed to hold pizzas, sandwiches and other wrapped foods while maintaining consistent temperature requirements for food quality and safety (HACCP).**

### FEATURES

- Microprocessor controls exact heat intensity to furnish a specific temperature for top and bottom of each tier
- Delivers a wide range of temperature capabilities to fill exact warming and holding requirements
- Flat surface allows for easy wipe-clean application
- Food stays “presentation ready” longer because exact internal temperatures can be reached faster and maintained longer
- Illumination is provided by (3) 25 watt, 36” fluorescent lights
- 4 channel timer

### CONSTRUCTION

- Heavy gauge stainless steel
- Designed and built to custom specifications with heat radiating from the ThermoGlo™ surfaces
- Designed with a flat unbreakable radiating metal face encased in stainless steel housing

**ETL (US & Canada) & NSF Listed  
FOR COMMERCIAL USE ONLY**
