Models FR24BG FR1212BG

Front Return Conveyor Gas Broilers for Gourmet Burgers

Item No: _____

AIA FILE NO. / SPEC NO.

CONSULTANT/ CONTRACTOR APPROVAL

Model FR1212BG

Marshall Models FR24BG & FR1212BG Gas Broilers are designed for high volume hamburger or meat filet production. The hybrid burner technology easily broils a variety of gourmet meat items, such as ½-lb. burgers, chicken filets, steaks and seafood, sealing in juices for better taste.

The Model FR24BG has a single 24" belt for broiling, while the Model FR1212BG has dual 12" broiling belts, which allow for different cooking speeds and menu flexibility. In both models, food is loaded at the front of the broiler and automatically delivered to the front heated holding section.

All Marshall products are supported by a nationwide service organization and an in-house, full-time Customer Support Department. To place an order call:

Marshall's large capacity, high production hamburger and specialty meat broilers. Hybrid burner technology and direct conveyor broiling for speed, flavor enhancement and bar marks.

FEATURES

- An integrated touch screen control features 12 programmable menu item cook times per belt
- Front return cooking arrangement – fully automatic
- Electronic ignition – simply use on/off switch
- Transfer belt dispenses product onto cooking belt automatically
- Individual plug-in motors for speed control of each broiler belt
- Modulating gas system monitors cooking chamber temperatures for consistent cooking
- Integrated food probe and logging
- Sleek design allows for fast and easy clean-up

CONSTRUCTION

- Heavy gauge stainless steel solid weld frame construction
- 3/16" diameter, heavy duty stainless steel conveyor rods
- Stainless steel internal gas lines (gas models)
- Simple conveyor tension adjustment
- Easy to operate computer control panel
- Heavy-duty industrial grade gas burners

VOLUME

Hamburger Peak Production:

Frozen	2 oz. patties	725/hr.
	4 oz. patties	450/hr.
Fresh	2 oz. patties	950/hr.
	4 oz. patties	575/hr.
	8 oz. patties	310/hr.

(Figures for estimating only. Actual production varies with fat content, surface texture and meat starting temperature.)
